

Report on Meeting with International Contractors Association of Korea

We are happy to inform you that International Contractors Association of Korea approached us to seek cooperation of CIDC. A coordination meeting was organized on August 6th 2020 to deliberate on various segments of AEC sector (Architecture Engineering and Construction). In brief we discussed the currently ongoing activities of Korean Construction Industry which is about US\$ 440 billion. We discussed the areas of possible cooperation between us which included cooperation between Indian & Korean companies, provision of human resources from India to Korean/ International Projects being executed by Korean Companies, provision of technical services by Indian companies & engineers to Korean/ International Projects, possibilities of introduction of Korean real estate companies in Indian Markets. We hope this would provide openings to our companies, consultants, engineers, supervisors, migrated professionals returning from overseas employments post attack of Covid19, and individual construction professionals and workers.
